

GOOGLE TMT HACKATHON 2026

CALL FOR APPLICATIONS

Build Tools. Break Barriers. Bridge Languages.

Under the Google Trilingual Machine Translation (TMT) Project

Google TMT Hackathon 2026 is a hands-on innovation challenge inviting students to build real-world innovative applications to support multilingual machine translation system use cases.

WHO CAN APPLY

- Students enrolled at any recognized academic institution.
- **Participation Type:** Individual or teams comprising up to 4 members.

COMPETITION TRACKS

Track 1 – Browser Plugin / Extension

Build a Chrome or Firefox browser extension that translates web content in real time using the TMT API. Your plugin must support multiple translation directions as indicated below:

- **English ↔ Nepali**
- **English ↔ Tamang**
- **Nepali ↔ Tamang**

For reference Google TMT link: <https://tmt.ilprl.ku.edu.np/>

Track 2 – File Translation Tool

Build a tool that accepts a text document, translates its content using the Google TMT API, and returns a fully reconstructed output file in the same format and layout as the original as far as possible.

Supported input/output formats:

- .pdf – Full layout preservation required (fonts, columns, spacing)
- .docx – Structure and formatting must be maintained
- .csv/tsv – All cells translated regardless of content type

File constraints:

- Maximum file size: **1 MB per upload**
- Translation by the TMT System is at the sentence-level; the system does not support paragraph-level batching
- Output file must match the input format exactly – no format conversion

TMT API ACCESS

All registered participants will receive access to the TMT system and API credentials. Upon successful registration via Google Form, participants will be added to an official WhatsApp/Discord group where the following will be shared:

- API endpoint documentation
- API key for your team
- Integration guide and sample input/output

IMPORTANT DATES

Call Opens	April 20, 2026
Registration Deadline	April 25, 2026(11:59 PM NST)
Submission Deadline	April 30, 2026 (11:59 PM NST)
Demo & Evaluation	May 5, 2026
Results Announcement	May 5, 2026

AWARDS

Track	Winner	Honorary Mentions (Up to 3 teams)
Browser Plugin / Extension	NPR 25,000	NPR 5,000
File Translation Tool	NPR 25,000	NPR 5,000

- Prize amounts are awarded to the team.
- Certificates of participation will be issued to all participants completing the submissions.
- Applicable taxes on the prize amount will apply.

SUBMISSION REQUIREMENTS

All submissions must be made via the official submission link within the deadline. Each submission must include:

- Source code in GitHub with source history
- Executable / deployable build should also be included in a GitHub release
- README file should contain the user guide and system details
- Demo instructions (video link) should be included in the README

Incomplete submissions – missing any of the above – will not be evaluated.

EVALUATION CRITERIA

Functionality & Accuracy	Does the tool work correctly across all supported language pairs?
Innovation & Usability	Is the solution thoughtful, intuitive, and easy to use?
System Design	Is the codebase well-structured and maintainable?
User Experience	Does the interface feel natural and polished?
Documentation & Demo	Is the submission clear, complete, and easy to evaluate?

Note: More detailed checklist/expected feature list will be shared to the registered team.

ORIGINALITY POLICY

All submitted work must be original and developed specifically for Google TMT Hackathon 2026. Projects built prior to the competition or submitted to other events are not eligible. By submitting, participants confirm that the work is entirely their own.

Upon submission, all code and associated materials must abide by the Open Source MIT License.

FREQUENTLY ASKED QUESTIONS

Q: Is there a restriction on programming language or framework?

A: No. You are free to use any language, framework, or library as long as your tool integrates with the TMT API and meets the submission requirements.

Q: Can a team member be from a different university than the rest of the team?

A: Yes. All team members must individually be enrolled at a recognized academic institution, but members may come from different institutions.

Q: What happens if the TMT API is unavailable during development?

A: The official WhatsApp/Discord group will be the primary channel for any API outage updates. Reach out to the organizers immediately if you face access issues.

Q: Will the demo on May 5 be in-person or online?

A: The demo session will be held in a hybrid format. Registered participants will be notified through the official communication channels with further details.

CONTACT & COMMUNICATION

For queries, reach out to the organizing team via **WhatsApp / Discord Group**, shared with all registered participants upon sign-up.

ORGANIZER INFORMATION

Information and Language Processing Lab,
Department of Computer Science and Engineering,
Kathmandu University, Dhulikhel, Nepal
